DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 41-67, drawn to a method of displaying market information, classified in class 705, subclass 40.
 - II. Claims 68-90, drawn to a method of displaying market information, classified in class 705, subclass 40.
 - III. Claims 91-116, drawn to a method of displaying market information, classified in class 705, subclass 40

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate. For example, the first and second indicators are indicated implied volatility. See MPEP § 806.05(d). In the instant case, invention III has separate utility. For example, unlike inventions I and II, this invention not dynamic and therefore could be used in display units with limited processor speeds. In the instant case, invention I has separate utility. For example, unlike inventions II and III, the first and second indicators are not limited to the inside market. Rather the invention of group I, could display other information related to the inside market, such as implied volatility. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination

purposes as indicated is proper.

4. A telephone call was made on May 13th to request an oral election to the above

restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Respectfully

Richard Weisberger
